

ADVANTAGES

- ISO 10121-1:2014 tested media
- Available in a range of sizes
- Activated carbon impregnated to target ethylene oxide
- Able to be installed in any manufacturer's loose-fill filters

|                       |                                                                                          |
|-----------------------|------------------------------------------------------------------------------------------|
| Application           | Targets ethylene oxide. Used mostly for sterilization in the biopharmaceutical industry. |
| Media                 | Impregnated Activated Carbon                                                             |
| Max Temperature (°C)  | 40                                                                                       |
| Min Temperature (°C)  | 10                                                                                       |
| Relative Humidity max | 40%-90%                                                                                  |
| Installation Options  | All loose-fill molecular air filters.                                                    |
